SILENCE 

Made in Barcelona

(A vision for the world)

Silence is driven by a desire to improve the cities of the 21st century, by developing urban mobility that is light, accessible, connected and respectful of everyone.

The key to the future is electric.

"The best parts of the car
and the scooter combined
to create the S04"

S04

4 you
4 all
4 cities

Comfortable, safe and easy to park

The Silence way of owning a car: 100% electric and tailored to the city. Technology and compact size combined to create the very first nano car, a four-wheel electric vehicle that is fully connected and accessible for everyone.

228x129x159 cm

Made in Barcelona

Technology and European quality

Silence vehicles and batteries are designed, developed and manufactured in Barcelona. They all use the same trolley-style batteries, which are each interchangeable.

For the city

365 days a year,
for leisure or work.

90 km/h limited speed
and a range of up
to 149 km* for your
daily life.

Accessible for everyone

You can drive the S04 **without
a licence** if aged 15 or above,
with the maximum speed limited
to 45 km/h.

Optimised, functional space

A staggered seating arrangement, providing a feeling of spaciousness and freedom of movement.

Practical boot

The boot can be opened manually or via the app and it has a capacity of 310 L, allowing you to carry luggage, shopping bags or anything you need on a daily basis.

Reduce your footprint

Thanks to its compact size, you can park the S04 in scooter parking spaces* and occupy less than half of any parking spaces for cars.

*with L6e moped plate.

KEYLESS

Keyless, thanks to the APP

You can enter the cabin and start or stop the S04 quickly and easily using the "My Silence" APP, with no need for any key*.

Additionally, with the "My Silence" APP, you can activate the air conditioning and ventilation, lock the doors, activate the alarm and lower or raise the windows.

Download for free at

Hyperconnected

Everything you need to know about your S04 in the "My Silence" APP: where it is parked, the battery level and its range, the status of the vehicle, remote power on and off, door and the boot opening, route creation and information about reducing CO2 emissions, etc.

Charge at any power point

The S04 can be charged directly from the vehicle or you can charge each battery separately, both options use a Schuko power point.

The S04 can be driven with one or two trolley-style removable batteries. An innovative Battery Pack that has wheels and a handle, to make it easy and safe to transport.

at home

at a café

at the office

Break down the barriers of charging points

Avoid wasting time by charging the Battery Pack at any power point

FAST & EASY

Removal system

The S04 comes with two removable and interchangeable Battery Packs, one below the driver's seat and another below the passenger's seat

S04

Power Battery Pack

Km Range Battery Pack Usability		5.6 kWh
L6e 1 Battery Pack	WMTC	70 Km (Eco)
L7e 2 Battery Packs	WMTC	149 Km

The Silence Battery Pack's trolley-style Fast & Easy removal system is patented in **Europe - no. 2848456** - and is unique and one-of-a-kind.

The **handiest and easiest solution for removing and transporting the battery** to any power point. Made with aluminium cooling fins.

Steps:

1. Use the APP to open the S04's doors.

2. Operate the safety lever below the seat.

3. Remove the Battery Pack with the handle retracted by pulling it out.

4. Take the Battery Pack and connect it to any power point.

5. Once charged, unplug it.

6. Take the Battery Pack and insert it below the seat, making sure that the battery is properly secured.

Battery Station

Battery exchange

A quick, easy
and convenient
new concept
in mobility.

Buy your S04 without a battery and subscribe to the Battery Station service

Find your nearest Silence Battery Station and reserve your Battery Pack, which is available through the Silence APP. Come to the Battery Station, leave your Battery Pack in an empty unit and take another one that is fully charged.

Benefits

The benefits of the car and the electric scooter combined to create the S04

100% electric motor with lithium-ion batteries. 0 emissions, it reduces noise and air pollution

Accessible: No licence (L6e) if aged 15 or above.

Two-seater urban design, compact and spacious, designed to carry 2 people, with a boot that has a 310 L capacity.

Comfortable and safe. Includes ABS and, as the cabin is covered, it protects against adverse weather conditions.

A “stress-free” driving experience. Drive without any noise or vibrations.

Versatile range. Our large battery capacity covers 99% of all range needs for use in the city.

Easy to park. It occupies half a parking space for cars and one and a half scooter parking spaces.

Connected via the APP. You will always have control of your vehicle via the “My Silence” app. Keyless, no need for any key.

Removable and interchangeable batteries. Trolley-style, interchangeable with batteries from Silence scooters.

Battery pack owned by you

Subscription battery pack

Battery

Fill it up for 80% less: €100 of petrol = €20 of electricity.

Vehicle

Reduces maintenance costs by 30%. Only the tyres and brakes.

Savings

Battery

Monthly subscription cost.

Vehicle

The vehicle is cheaper to buy without the battery
